

AUTOSIMPLY

M/F Manufacturing Lot Add-on

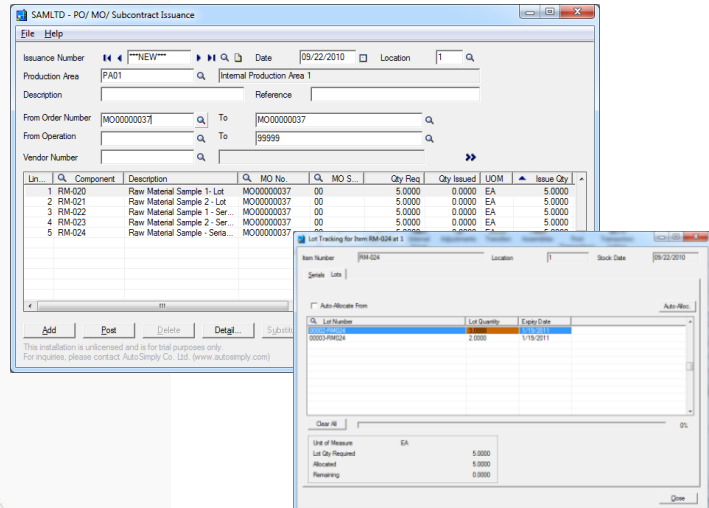

About AutoSimply

Founded in 2005, AutoSimply Company Limited is a Sage 300 Developer Partner focused on manufacturing and item planning solutions for Sage 300. Using 100% Sage 300 SDK, AutoSimply products does not only integrate with Sage 300 but is, in fact, fully built-into Sage 300. Simply designed and featuring the familiar Sage 300 look and feel, both Service Providers and End Users are sure to find AutoSimply products easy to implement and use.

The M/F Lot Tracking Add-on (M/L) module fully integrates with our Manufacturing Order (M/F) module and with the lot/serial tracking features of Sage 300 Inventory Control (I/C) module. It allows warehouse personnel to define lot/serial tracking information for materials issued, returned and received in the warehouse.

By integrating with Sage 300 I/C, AutoSimply M/L minimizes end-user workload in keeping track of lot records. Users now have only one stock balance to keep and one lot/serial tracking record to update. All lot/serial balance and history records are kept within Sage 300 I/C.

M/L requires the M/F module and Sage 300 I/C v5.6 modules or later.

Visit us at www.autosimplify.com or call 852-2366-8392 today for more information.

Development Partner

Main Features

Seamless Sage 300 I/C Lot/Serial Tracking Integration

- Allows M/F to be fully online. All material issuances, returns and receipts immediately reflected in Sage 300 I/C.
- No separate item lot/serial setup. All item definitions are based on the I/C Item maintenance.
- Supports expiry date, item quarantine days, customer warranty, supplier contract days

AutoSimply

M/F Manufacturing Lot Add-on

Single Lot/Serial Tracking System

- Define lot properties in I/C Item such as lot number mask, expiry days, quarantine days, warranty and contract details
- Define serial number properties in I/C Item such as expiry days, warranty and contract details
- Combines purchase and sales lot/serial history with manufacturing transaction history via standard Sage 300 I/C inquiries
- Supports existing lot/serial Sage 300 I/C queries and reports.

Lot/Serial Tracking for M/F Receipt

- For lot/serial tracked items, user is required to allot MO receipts user-defined lot numbers
- User-friendly interface with Sage 300 I/C look and feel
