

Nebraska Plastics

Nebraska Plastics uses PrintBoss software to:

Run their AP checks and Payroll checks

Process their Sales Orders

Nebraska Plastics use PrintBoss software to print 3 to 5 copies of the order depending on what they need for the order: e.g. Customer copy, Office Copy, Salesperson copy, Shipping Copy and the Packing Slip.

These copies are sent to different printer trays so they print on different color paper – making it easier for their staff to process the paperwork.

The packing slip has the pricing hidden – since sometimes shipments are being sent to someone other than who is paying for it. This saves them time – they don’t have to print an order with pricing, and then separately print a packing slip. The customer is emailed their copy if they have an email on hand for them.

Many of their customers do not have email, and prefer to receive the order via fax – so Nebraska Plastics uses the PrintBoss fax service to fax out their order.

1. This saves them staff time (labor), the cost of having a fax machine/fax server/paying for the long distance calls, etc.
2. The fax copy is sent to the PrintBoss website and they send out the fax based on a price per page fee (7 cents to 11 cents per page). They can pre-order pages to get a deeper discount. The software can also automatically reorder if the number of pages available on their account hits below the minimum.

PrintBoss Fax Service Prepaid Pages					
Page Quantity	250	500	1,000	2,000	10,000
Price per page	\$0.11	\$0.10	\$0.09	\$0.08	\$0.07
Total Cost	\$27.50	\$50.00	\$90.00	\$160.00	\$700.00

3. If there is no email or fax, the order is printed so it can be mailed out.
 - a. If the salesperson chooses, they receive an email copy of the order - which helps them follow up with customers on any new orders and make sure that the orders are shipped/paid for on time.

For more information on how you can use PrintBoss software at your business contact Front Line Systems at 866-435-0243 or contact us via our website at www.flinc.net.
