sage 300 and sage 300c

Edition overview

We believe your business management solution should support your business strategy—not hinder it or force you to buy too much too soon. That's why Sage offers the products on which to build your business. If your business plans involve adding more employees, supporting multiple locations or global operations, diversifying, or offering new services, Sage 300 and Sage 300c provide a strong foundation. Choosing Sage 300 or Sage 300c gives you the flexibility to build the best possible solution for your business by giving you the freedom to select the edition

(Standard, Advanced, and Premium), database, modules, deployment method, and payment options that keep your total cost of ownership as low as possible.

In addition, Sage 300c provides our customers with anytime, anywhere and any-device access to business and transactional data, critical to supporting today's increasingly mobile and geographically dispersed operations. Whichever version of Sage 300 you choose, our flexible offerings ensure a perfect fit with your business.

Easily adopt new functionality without retraining your staff, as each Edition is developed using the same technology and intuitive workflow.

Superior architecture

As your business looks for cost-effective ways to meet your bottom line, Sage 300 and Sage 300c provides the foundation required to keep pace with ever-changing technology without giving up the functionality you need to compete in today's marketplace. Accelerate the growth of your company with the scalable, open architecture of Sage 300 and Sage 300c. Versatile transaction processing and language translation capabilities provide the flexibility you need to succeed in global markets, and seamless integration throughout allows you to automate your workflows, no matter how many currencies your company is managing. No matter what Edition you choose, you have the option to utilize multiple server and client operating systems, and customization tools.

Global reach—local touch

An international presence is essential for doing business in today's global economy. Whether your business has one or several locations in the same city or across international borders, Sage 300 helps small and midsized companies manage finances, operations, and inventory in multiple languages and currencies. With real-time, mobile access and visibility across your entire company to keep your business on track, Sage 300c also allows you to break down departmental silos for companywide transparency and improved collaboration, and tap into a real-time, unified view of your company's finances and operations.

sage 300 and sage 300c

Built to fit your business

Both Sage 300 and Sage 300c have been designed to help you slash the time and cost associated with complex processes and redirect those resources toward growing your business. Whether you choose the Standard, Advanced or Premium Edition, you can select from any of the Sage 300 and Sage 300c applications to create a custom-fit solution to support your end-to-end business management requirements. Whether on-premises or hosted, you'll be able to process orders, fulfill orders on time, make and accept payments, reconcile your books across multiple companies and currencies, pay employees and manage projects, all with one trusted solution, Sage 300 or Sage 300c.
